OFFICIAL OPERATIONAL MANUAL

SYSTEM MANUAL • VERSION 2.0

MEMOTRACKER SYSTEM USER MANUAL

Comprehensive step-by-step guide for institutional correspondence, multi-tier budget requisitions, executive approval routing, and audit tracking.

1. System Overview & Platform Access

The **CUA MemoTracker System** is the official digital portal for formal internal communications, institutional memo creation, financial budget requisitions, and multi-level administrative approval routing across Cosmopolitan University Abuja.

LIFECYCLE OF AN INSTITUTIONAL MEMO

1. Compose Memo

2. Route for Approval

3. Executive Review

4. Approval / Action

LOGGING IN & DASHBOARD NAVIGATION

1 Authentication & Single Sign-On

Access the portal using your official University staff email address and password. Access privileges are dynamically matched to your department and administrative role.

2 Dashboard Folder Structure

Navigate the main sidebar menu to access your primary workspace folders:

- **Action Needed / Inbox:** Memos submitted to you for review, endorsement, or approval.
- **Sent Memos:** Memos you initiated that are active in approval routing.
- **Drafts:** Unsubmitted memo drafts stored securely for future completion.
- **Archived:** Fully approved or completed institutional records.

SECURITY & CONFIDENTIALITY NOTICE

Role authorization enforces strict privacy. Only designated recipients under TO, CC, or BCC can view memo details. Keep your credentials secure at all times.

2. Composing Official Memos

To initiate formal correspondence, click the "+ New Memo" button on the sidebar layout.

STEP-BY-STEP COMPOSITION GUIDE

1 General Memo Configuration

Enter a descriptive, uppercase subject title (e.g. "REQUISITION FOR COMPUTER LABORATORY UPGRADE") and select your originating Department and Category.

2 Priority & Expiry Parameters

Set memo urgency (Low, Medium, High, Urgent). Setting an optional expiry date flags time-sensitive requests for priority action by reviewing officers.

3 Recipient Routing Setup (To, CC, BCC)

Select primary approval officers under **To**. Add informational recipients under **CC** and confidential oversight under **BCC**.

4 Rich Content & File Attachments

Format your memo text using the rich text toolbar. Attach supporting documents (proforma invoices, technical specifications) via the bottom toolbar.

FINANCIAL REQUESTS REQUIREMENT

If your memo requests institutional funds or expenditure approval, you **MUST** attach a digital **Financial Requisition** using the dedicated module explained on Page 4.

3. Financial Budget Requisitions

When drafting a memo requiring financial expenditure, toggle "**Attach Financial Requisition**" to enable structured multi-tier budget itemization.

THE 3-TIER MULTI-LEVEL SELECTION UX

To eliminate generic lump-sum estimations, MemoTracker implements a 3-tier hierarchy for exact itemized accounting:

SELECTION LEVEL	PURPOSE & FUNCTION	EXAMPLE SELECTION
Tier 1: Category	Main University budget expenditure classification	ADVERTISING
Tier 2: Item Group	Specific category class or group name	EQUIPMENT PURCHASE
Tier 3: Specific Sub-Item	Exact individual requested asset or item	LAPTOP / CAMERA / SOUND SYSTEM

CONFIGURING REQUISITION LINE ITEMS

1 Full-Screen Requisition Modal

Click "**Add Requisition Items**". The full-screen modal opens displaying the active **Fiscal Year** badge (e.g. FY: 2025/2026) in the modal header description.

2 Selecting Specific Items

Select your Budget Category, choose the Budget Item Class, then select the Specific Sub-Item. The system formats the item title cleanly as Equipment Purchase - Laptop.

3 Automatic Description & Pricing Retrieval

When an item is selected, the system automatically fetches its pre-stored **Description**, **Quantity**, **Unit Price**, and calculates the total subtotal from the University database.

4. Requisition Management & Routing

REQUISITION ATTACHMENT REMOVAL RULES

The system enforces smart UX rules for removing or detaching requisitions:

1 New Requisitions (Clean UX)

When starting a fresh memo, removal buttons remain hidden to prevent interface clutter before items exist.

2 Detaching / Removing an Added Requisition

Once items have been added, a red **"Remove"** button appears on the card and a **"Delete Requisition"** button appears in the modal header. Clicking this detaches the requisition without refreshing the browser page.

SUBMITTING MEMOS: "ROUTE FOR APPROVAL"

UNIFIED ACTION LABELING

All primary submission controls on both top and bottom toolbars are explicitly labeled **"Route for Approval"** for absolute operational clarity.

3 Submission Actions

- **Save Draft:** Saves the memo locally for future editing. No recipient notification is triggered.
- **Route for Approval:** Locks the document and routes it into the sequential approval pipeline for designated HODs, Deans, Bursary, and Executive Management.

TRACKING PROGRESS & AUDIT TRAIL

Track live routing progress in your **Sent Memos** inbox. The audit timeline records officer reviews, comments, endorsements, approvals, or amendment requests in real time.
